On page 57, please amend the text from line 3-9 with the following:

1
2 --A method of generating a development project including at least a
3 matrix switch and one or more adjacent objects is presented. In one
4 embodiment, the method comprises~~comprising~~ establishing an initial
5 rendering of the development project, and negotiating buffer size and
6 attributes between an input/output coupling the matrix switch to an
7 input/output of the adjacent objects[.,.]. In at least some
8 embodiments,~~wherein~~ the negotiated buffer is utilized to communicate
9 information between the input/output of the matrix switch and the
10 input/output of the adjacent object by sharing information via the shared
11 buffer.--
